

## Core Cross Disciplinary Early Childhood Competency Areas

The contents of this report were developed under a cooperative agreement #H325B17008 from the Office of Special Education Programs, US Department of Education. However, those contents do not necessarily represent the policy of the US Department of Education, Project Officer, Tracie Dickson, PhD.

## **Core Cross Disciplinary Early Childhood Competency Areas**

The Early Childhood Personnel Center (ECPC) was funded by the Office of Special Education Programs (OSEP) at the U.S. Department of Education to provide technical assistance to state systems of early childhood intervention and Institutions of Higher Education (IHE) on issues related to personnel development. One initiative of the ECPC has been to collaborate with professional organizations to identify core cross disciplinary competencies for all personnel serving infants and young children with disabilities and their families

Over the past four years the seven national organizations representing disciplines providing services in early childhood have been participating in this initiative: the American Occupational Therapy Association (AOTA); the American Physical Therapy Association (APTA); the American Speech-Language-Hearing Association (ASHA); the Council of Exceptional Children (CEC) and the Division of Early Childhood (DEC), the National Association for the Education of Young Children (NAEYC); and ZERO TO THREE.

Each of these organizations provided the most recent description(s) of their personnel standards or competency areas (specific to their discipline) to the ECPC. A comparison was done across each of these documents (see **Appendix A**) to identify common areas of competence across all disciplines.

## Collaboration and Coordination Family Centered Practice Interventions as Informed by Evidence Professionalism and Ethics

The frequency of all competencies across the core competency areas is on **Table 1**, and sample items that appeared in at least two discipline documents are listed on **Table 2**.

Representatives from each of the seven professional organizations reviewed the competency areas and sub-areas and will be presenting these core competency areas for approval to each of their respective organizations.

The ECPC will create guides and exemplars of practice to demonstrate the core cross disciplinary competency areas for use by professional organizations, Institutions of Higher Education and State Systems of Early Childhood Personnel Development.

For further information about **The Early Childhood Personnel Center**Please contact Dr. Mary Beth Bruder (ECPC Director) at 860-679-1500 or <u>bruder@uchc.edu</u>.
